Easy to use, cost-effective mortars for concrete repair
Easy-to-use, Cost-Effective Repair Mortars for Concrete

For horizontal repairs...

SikaRepair 222

SikaRepair 222 is a cost-effective repair mortar designed for quick-setting concrete patch applications. This portland cement-based mortar is ideal for fast-set repairs at an economical price.

SikaRepair 222 is easy to handle and finish, allowing the fast completion of horizontal repairs that meet the project requirements.

ADVANTAGES
- High early strength
- Easy to mix, place and finish
- Just add water*
- Versatile - great for quick patch repairs

APPLICATIONS
- Slabs and balconies
- Parking structures
- Civil structures
- General repair needs

SikaRepair SHA (accelerated)
SikaRepair SHB (non-accelerated)

For vertical and overhead repairs...

SikaRepair SHA and SHB are contractor-friendly mortars specifically designed for vertical and overhead repairs requiring a high build-up without sagging.

Both SHA (accelerated) and SHB (non-accelerated) are lightweight portland cement-based mortars whose easy handling and finishing allow contractors to greatly increase their productivity.

ADVANTAGES
- Lightweight, high-build consistency
- Easy to mix and place
- Easy, smooth troweling and finishing
- Very low shrinkage - reduces cracking
- Just add water*
- Great versatility - slow or fast set available

APPLICATIONS
- Building facades
- Balconies
- Parking structures
- Civil structures

*For repairs down to 1/8" in depth, use SikaLatex R in lieu of water.
**SikaRepair 222 may be extended with coarse aggregate when deeper repairs are required. Refer to technical data sheet for extension guidelines.

All SikaRepair mortars are mixed with water to produce the consistency desired. SikaLatex R liquid may be used instead of water when improved bond and/or reduced permeability are desirable. Consult technical data sheet for properties using SikaLatex R.
